

Our Mission:

Safety and Security of human lives and valuable assets whether in a house, workplace, school, campus or a shopping place is of prime importance. Early detection and timely alert can save precious human lives and property which could, otherwise be lost because of fire, theft, robbery, etc.

In this context, we, at present ourselves as leading suppliers of world-class security devices including: CCTV Digital Systems, CCTV Digital Recorder, Remotely Monitoring Systems, etc. We have an extensive supplier-distributor network spread across the globe that enables us to procure the best brands that are known for their technical superiority, precision, long-life and ease-of-operation and installation.

We only carry Professional Grade security cameras and that equals quality. This is not the same type of surveillance camera equipment that you might have seen somewhere else. Sometimes the same manufacturer designs several lines of products in order to attract different customer levels. The highest quality line of every manufacturer is their Professional Grade line and that is all we carry. We might not carry the lowest price camera line but we do have the best quality for the lowest price on the market. These security camera systems are made of the finest quality parts and industrial decks, durable enough to operate 24 hours a day 365 days a year in some of the harshest environments in the world

Products:

We offer cutting-edge security and surveillance devices for detection and protection. Our devices are renowned for technical superiority, precision, long-life and ease-of-operation and installation.

We deal in:

CCTV Security Systems	
Our CCTV Security Systems use a combination of CCTV digital system, CCTV security cameras for sound surveillance providing detection of any suspicious activity, leading to protection of people and property.

Products:

Dome Camera

1/3" Sony High Resolution Color Dome (W/O Audio)

This is a color CCD video camera employs a 1/3" CCD (charge coupled device) solid-state imaging device which provide extremely long life and high reliability. The camera provides more than 480TV lines resolution and different view angle of lenses are selectable. Microphone is also designed for this 24 hours standby surveillance camera and audio function.

Features

480 TV lines of horizontal resolution and high quality picture.

1/3" Sony Color CCD image sensor

Built-in auto electronic shutter.

Minimum illumination of 1Lux / F2.0.

Signal-to-noise ratio of 46dB (AGC off).

Out Door IR Camera

1/3" Sony Color IR Camera

This is a 1/3" Color CCD video camera employs a 1/3" Color charge coupled device solid-state imaging device which provide extremely long life and high reliability. The camera offers excellent reproducibility with low lag and high burn resistance, and is not subject to distortion from magnetic fields and the camera functions reliability in wide temperature range.

Features

1/3" Sony Super HAD Color CCD

350 TV lines.

1Lux / F2.0, 0Lux (10 meter ON).

Water Resistance: IP 57

IR LED: 12 units Infrared LED

Effective Range: Over 10 Meters

Automatic IR trigger-on under low illumination

Automatic IR off under normal illumination

C-Mount Camera

1/3" Sony Color CCD Camera (AC Type)

This is a color CCD video camera employs a 1/3" Color CCD (charge coupled device) solid-state imaging device which provide extremely long life and high reliability. The camera provides more than 350TV lines resolution and different view angle of lenses are selectable. Microphone is also designed for this 24 hours standby surveillance camera.

Features

350 TV lines of horizontal resolution and high quality picture.

Minimum illumination of 0.3 Lux/F1.2

AES / V.D / D.D Selectable.

Signal-to-noise ratio of 48dB.

Back Light Compensation on/off selectable.

Auto Gain Control on/off selectable.

Flickless on/off selectable.

DVR Card (4Ch,8Ch,18Ch real time)

Video input : 4 channel video inputs with BNC

Audio input : 2 channel audio input with microphone

Surveillance Channel: 4 cards can be inserted in the same PC at most, to form 16 surveillance screen real -time display modes

Video resolution : 640 X 480, 352 X 288, 320 X 240 (both view and playback)

compression mode : Latest MPEG-4 / H.264

Compression ratio : 60-150M/C/H (60-150M of hard disc each channel per hour)

video total frame rate: 120fps in NTSC, 100 fps in PAL for display and recording

Operating System: Windows2000 Professional / Server / XP

Network protocol : TCP/ UDP

Network Port : 9000/9001/9002

Now, use your mobile phone to
view LIVE video images
of your Office/Home/Shop/Factory/..
from anywhere in the world.

AT A VERY AFFORDABLE ONE-TIME INVESTMENT

What is C-Live?

C-Live is a Software Application which will enable you to view live images of a location on your Mobile Phone. You can also view the same images on your PC or Laptop or even a PDA(Personal Digital Assistant).

Who has developed C-Live ? or What is Nexeia ?

C-Live is a Quality Product developed by Nexeia Technologies Private Limited.

Why should I buy C-Live ? What is its USP ?

C-Live is a Software Application which will allow you to monitor what is happening at a particular location. You can view the live images of the location on your Mobile Phone irrespective of where you are. All you need is a PC with an Internet connection & a camera at the location.

What kind of PC is required ? What about the Camera & Internet Connection ?

Pentium PIII or PIV PC with 256 MB RAM.

Operating System can be Windows 98 or 2000 or ME or SE or 2003 or higher.

Internet Connection with a Static IP address is preferable. The Internet connection can be a Cable/ DSL/ Dial up. C-Live will hardly take 2MB disk space.

Any Windows Compatible Web Camera or IP Camera will be supported by C-Live. Images captured via CCTV, DVR cards video out too can be streamed to a Mobile phone using C-Live.

What about the Mobile Phones and the service to be subscribed ?

Pentium PIII or PIV PC with 256 MB RAM.

Operating System can be Windows 98 or 2000 or ME or SE or 2003 or higher.

Internet Connection with a Static IP address is preferable. The Internet connection can be a Cable/ DSL/ Dial up. C-Live will hardly take 2MB disk space.

Any Windows Compatible Web Camera or IP Camera will be supported by C-Live. Images captured via CCTV, DVR cards video out too can be streamed to a Mobile phone using C-Live.

Can More number of people view the same location ?

Yes, any number of people can view the location, provided they are authorized by you.

How does C-Live actually work ?

When you start the C-Live application on the Mobile phone the application connects with your PC through the Internet & shows you the live images captured on your PC.

How will I install the software ?

You will get a Software CD along with a Security Device. You will have to install C-Live on the PC to capture the images through the Camera. Also one needs to install software on the Mobile phone. Both the PC and Mobile software are available on the CD as well as from the Website www.dis.clive.in/download.wml.

The C-Live software is self installable.

Can I record the Images ?

Yes, The recording can take place on the PC. You can review the recorded files at your leisure at your convenience. The recording will take place in AVI format. You will need to have Disk space free on your hard disk for the recording.

Can anyone else view the Images ?

No, as there are 2 levels of Password Protection and hardware dongle protection.

These 2 levels of Passwords that are used is for the mobile phone & the 2nd level is for the location from where the images are streamed

Can I view multiple locations from the same mobile ?

Yes, you can create multiple channels on your mobile phone & view whichever channel you desire.

Can I Talk on my Mobile phone & also view images at the same time ?

Yes, you can create multiple channels on your mobile phone & view whichever channel you desire.
